**BOLOGNESE HEART,
ITALIAN FLAIR,
LEGENDARY STYLE.**

INIMA BOLOGNEZA,
RAFIMENT ITALIAN,
STIL LEGENDAR.

OUR ROOTS.

1950. Casadio was born in Bologna, a city renowned for its mechanical prowess and rebellious spirit. Nello Casadio, a self-made man and Casadio's founder, overlooked the first workshops production, where each piece was individually handcrafted.

Another reason why, from its inception, it has been a reliable entity, recognized for its top-notch bar equipment, especially coffee grinders, essential for serving excellent espresso coffee.

Our symbol is Neptune, the god of the seas, who's towered over Bologna's main square for five centuries. Every day, we strive to be the go-to reference for those seeking sturdy, reliable espresso machines and coffee grinders worldwide.

ORIGINI.

1950. Casadio a luat nastere in Bologna, un oras renumit pentru maiestria sa mecanica si spiritul sau rebel. Nello Casadio, un om care si-a construit singur drumul si fondatorul Casadio, a supravegheat productia primului atelier, unde fiecare piesa era realizata manual, cu atentie la detalii.

Acesta este unul dintre motivele pentru care, inca de la inceput, compania a fost recunoscuta ca un producator de incredere, cunoscut pentru echipamentele sale de bar de inalta calitate, in special pentru rasnitele de cafea, esentiale in prepararea unui espresso excelent.

Simbolul nostru este Neptun, zeul marilor, care vegheaza de cinci secole asupra pietei principale din Bologna. In fiecare zi, ne straduim sa fim punctul de referinta pentru toti cei care cauta espressoare si rasnite de cafea solide si fiabile, apreciate in intreaga lume.

EASY
TO
USE

CASADIO NETTUNO

EMBRACE YOUR AMBITIONS. Casadio refreshes its range of coffee machines and introduces Nettuno. A modern and highly customizable design. Ergonomics and ease of use make it the best choice for those needing a high-performance and ergonomic espresso machine, without sacrificing style.

IMBRATISEAZA-TI AMBITIILE. Casadio isi reinnoieste gama de masini de cafea si prezinta modelul Nettuno. Un design modern si puternic personalizabil. Ergonomia si usurinta in utilizare o fac cea mai buna alegere pentru cei care cauta o masina de cafea espresso performanta si ergonomica, fara a renunta la stil.

VERSATILE

BREW
A GREAT
CUP

MODERN TECH AND EASE OF USE.

Casadio Nettuno combines the best technologies and simplifies the barista's work, allowing them to focus on customers and optimize time.

TEHNOLOGIE MODERNA SI UTILIZARE USOARA.

Casadio Nettuno imbina cele mai bune tehnologii si simplifica munca baristului, permitandu-i sa se concentreze asupra clientilor si sa optimizeze timpul.

INNOVATIONS FOR CONSISTENTLY GUARANTEED QUALITY. INOVATII PENTRU O CALITATE CONSTANT GARANTATA.

STEEL BOILER

Ensures optimal performance and superior quality standards compared to any other material.

BOILER DIN OTEL

Asigura performante optime si standarde superioare de calitate fata de orice alt material.

THERMOSYPHONIC THERMAL SYSTEM

Maintains the machine's thermal stability and excellent performance, even during peak times.

SISTEM TERMIC TERMOSIFONIC

Mentine stabilitatea termica a echipamentului si performantele excelente chiar si in perioadele de varf.

HOT WATER MIXER

Mixes cold and hot water to keep the perfect temperature, simplifying the barista's work.

MIXER APA CALDA

Amesteca apa rece si apa fierbinte pentru a mentine temperatura ideala, simplificand munca baristului.

STEAM MILK LIKE A PRO.

The automatic Easy Steam wand ensures perfect milk frothing, consistently, even for less experienced baristas.

SPUMEAZA LAPTELE CA UN PROFESIONIST.

Sistemul automat Easy Steam garanteaza o spumare perfecta a laptelui, constanta si precisa, chiar si pentru baristii mai putin experimentati.

BRIGHTEN YOUR SPACE WITH A STRIKING LOOK.

Casadio Nettuno introduces an entirely new aesthetic. From the presence of LEDs behind the buttons simplifying the operator's gestures to the ergonomic portafilters, enriched by the detail of the Casadio logo on the portafilter cap, right through to the actual design of the machine: modern shapes and the possibility of customizing the bodywork, make each machine unique and suitable for any location. Casadio Nettuno is available with fine white panels or elegant black ones.

ADU STRALUCIRE SPATIULUI TAU CU UN DESIGN IMPRESIONANT.

Casadio Nettuno aduce o estetica complet noua. De la LED-urile amplasate in spatele butoanelor, care simplifica gesturile operatorului, pana la manerele ergonomice ale portafiltrului, accentuate de logo-ul Casadio gravat pe capac, fiecare detaliu reflecta atentie si stil. Designul modern, cu forme fluide si posibilitatea de personalizare a carcasei, face ca fiecare echipament sa fie unic si potrivit pentru orice tip de locatie. Casadio Nettuno este disponibil cu panouri albe rafinate sau panouri negre elegante.

TELEMETRY SYSTEM: CONVENIENT AND EFFICIENT.

Using the Wi-Fi module, available as a kit, you can connect CASADIO NETTUNO to the telemetry system with an intuitive and user-friendly APP*. Work and maintenance planning gets easier by having data on machine consumption (dispensing and washing) and remote diagnostics (alarm history) just a click away.

*APP not proprietary to CG.

SISTEM DE MONITORIZARE INTELIGENTA: PRACTIC SI EFICIENT.

Prin intermediul modulului Wi-Fi, disponibil sub forma de kit, poti conecta CASADIO NETTUNO la sistemul de monitorizare inteligenta printr-o aplicatie intuitiva si usor de folosit. Planificarea activitatilor si a mentenantei devine mai simpla datorita accesului rapid la date despre consumul echipamentului (dozare si spalare) si la diagnosticarea de la distanta (istoric al alarmelor).

*Aplicatia nu este proprietatea CG.

EXCELLENCE MADE SIMPLE.

Every step of the way is sped up and eased down thanks to the new Human-Machine Interface, which has been designed for user-friendly navigation and intuitive recipe setting. A new graphic system guides the user through an improved User Experience in the use of all features, from brewing to Easy Steam and cleaning settings, as well as accessing consumption information. A whole new level of efficiency for a high-performance workflow.

EXCELENTA DEVINE SIMPLA.

Fiecare etapa este accelerata si simplificata datorita noii interfete om-masina (HMI), proiectata pentru o navigare usoara si setari intuitive ale retetelor. Noul sistem grafic ghideaza utilizatorul printr-o experienta imbunatatita de utilizare, acoperind toate functiile - de la prepararea cafelei si sistemul Easy Steam, pana la setarile de curatare si informatiile privind consumul. Un nivel complet nou de eficienta pentru un flux de lucru performant.

**WITH CASADIO,
STYLE GETS
EVERYWHERE.**

**CU CASADIO,
STILUL SE REGASESTE
IN FIECARE DETALIU.**

EXCELLENCE IN CAPS.

Casadio Nettuno offers a single-portion coffee solution, ideal for all those locations where coffee is not the core business.

Thanks to various portafilter kits, Casadio Nettuno Caps can handle both paper pods and the most common types of capsules*. Moreover, the volumetric pump ensures a high-level extraction process, quietly and quickly. Accelerate the work pace and ensure a perfect brew.

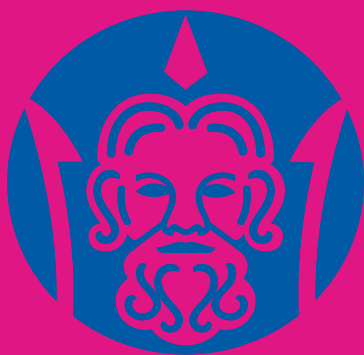

*Portafilter kits compatible with different types of capsule pods available.

EXCELENTA IN CAPSULE.

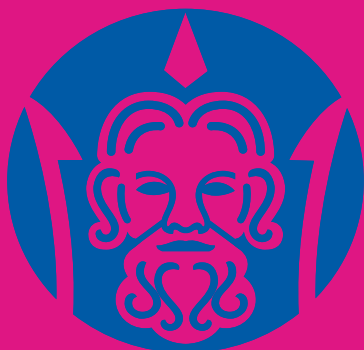

Casadio Nettuno ofera o solutie pentru cafea portionata individual, ideala pentru locatiile in care cafeaua nu reprezinta activitatea principala. Datorita kiturilor de portafiltru interschimbabile, Casadio Nettuno Caps poate utiliza atat pungi de cafea tip ESE (pods), cat si cele mai comune tipuri de capsule*. In plus, pompa volumetrica garanteaza un proces de extractie de inalta calitate, rapid si silentios. Astfel, ritmul de lucru este accelerat, iar fiecare cafea servita este perfecta.

*Kituri de portafiltru compatibile cu diferite tipuri de capsule sunt disponibile.

PLUG AND PLAY

BOUNDLESS FLEXIBILITY, LONG-LASTING AUTONOMY (CAPS MODEL EXCLUSIVE TECHNOLOGIES).

Casadio Nettuno CAPS is a PLUG & PLAY model: thanks to the water tank, there's no need for a water network connection or drain pan*. The three-liter tank ensures extended autonomy. The automatic control system alerts the barista - with a light indicator - once the tank's minimum capacity and the drain pan's maximum are reached. This way, you can act in advance without interrupting the workflow, also limiting the machine's wear. The tank is equipped with the Brita AquaAroma Crema filter, enhancing the water's purity for superior coffee quality.

*Alternatively, a water connection kit can be purchased.

FLEXIBILITATE FARA LIMITE, AUTONOMIE DE DURATA (TEHNOLOGII EXCLUSIVE MODEL CAPS)

Casadio Nettuno CAPS este un model PLUG & PLAY: datorita rezervorului de apa integrat, nu este necesara conectarea la reseaua de apa sau la tava de scurgere*. Rezervorul de 3 litri asigura o autonomie extinsa. Sistemul automat de control avertizeaza barista-ul, printr-un indicator luminos, atunci cand rezervorul atinge nivelul minim sau tava de scurgere nivelul maxim. Astfel, poti interveni din timp, fara a intrerupe fluxul de lucru si reducand uzura echipamentului. Rezervorul este dotat cu filtru Brita AquaAroma Crema, care imbunatatesta puritatea apei pentru calitate superioara a cafelei.

*Optional, se poate achizitiona un kit pentru conectarea la reseaua de apa.
